The 5 W's

- Who
 - Private Cloud Users
- What
 - Transition to a new datacenter infrastructure (where and how your data is processed and stored)
- When = Timeline (up next)
- Where
 - New datacenter in Dallas, TX and new disaster recovery site in Kansas City, MO
- Why
 - Improved performance and reliability; Enhanced security measures; Scalability; Innovative features and capabilities

Timeline and Expectations

Timeline

- Dec 2023 – project announcement
- Jan 2024 – webpage launch
- Mar 2024 – testing completed; overview webinar
- Q2 2024 – start sending out individual transition plans
- End of Q4 2024 – migrations completed!

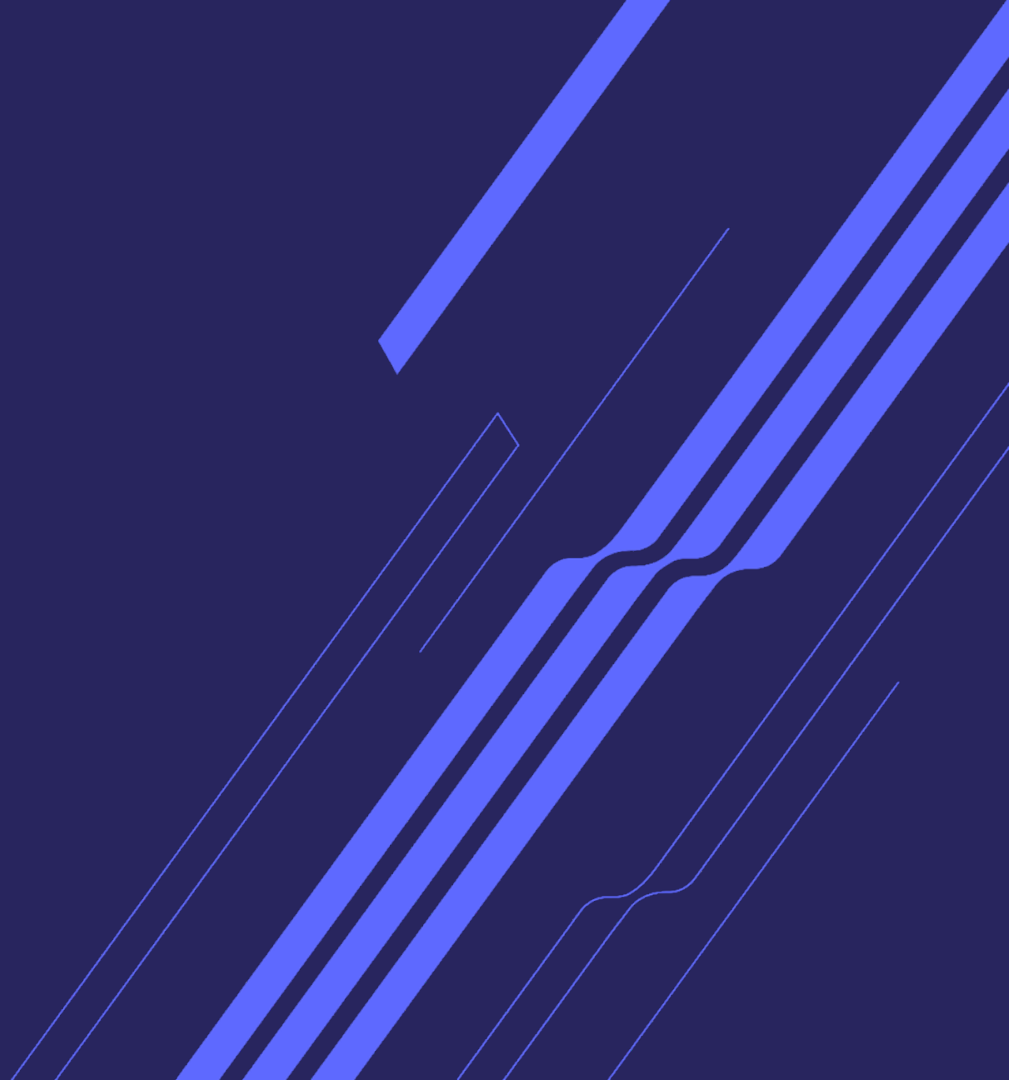

Expectations

- Benchmark testing
 - For 4vCPU systems, we're seeing >180% faster performance
 - For 2vPCU systems, >140% faster performance
- What to expect from us
 - Status updates on the Project Evolution Landing Page
 - Scheduled project overview meeting with Charles
 - After the Migration:
 - Assistance to access desktops at the new datacenter
 - Post go live support

Expectations cont'd

- What we'll expect from clients
 - Validate Firewall Access (IP Address, User and Password)
 - Time period dedicated for us to do the migration (After hours, over the weekend, etc.)
 - 24/7 Operations will migrate when they have less traffic on the environment
 - Confirmation everything has transferred over successfully, or if any issues
- Where you'll get updates
 - Emails from Charles
 - Updates webpage: rhodiangroup.com/project-evolution

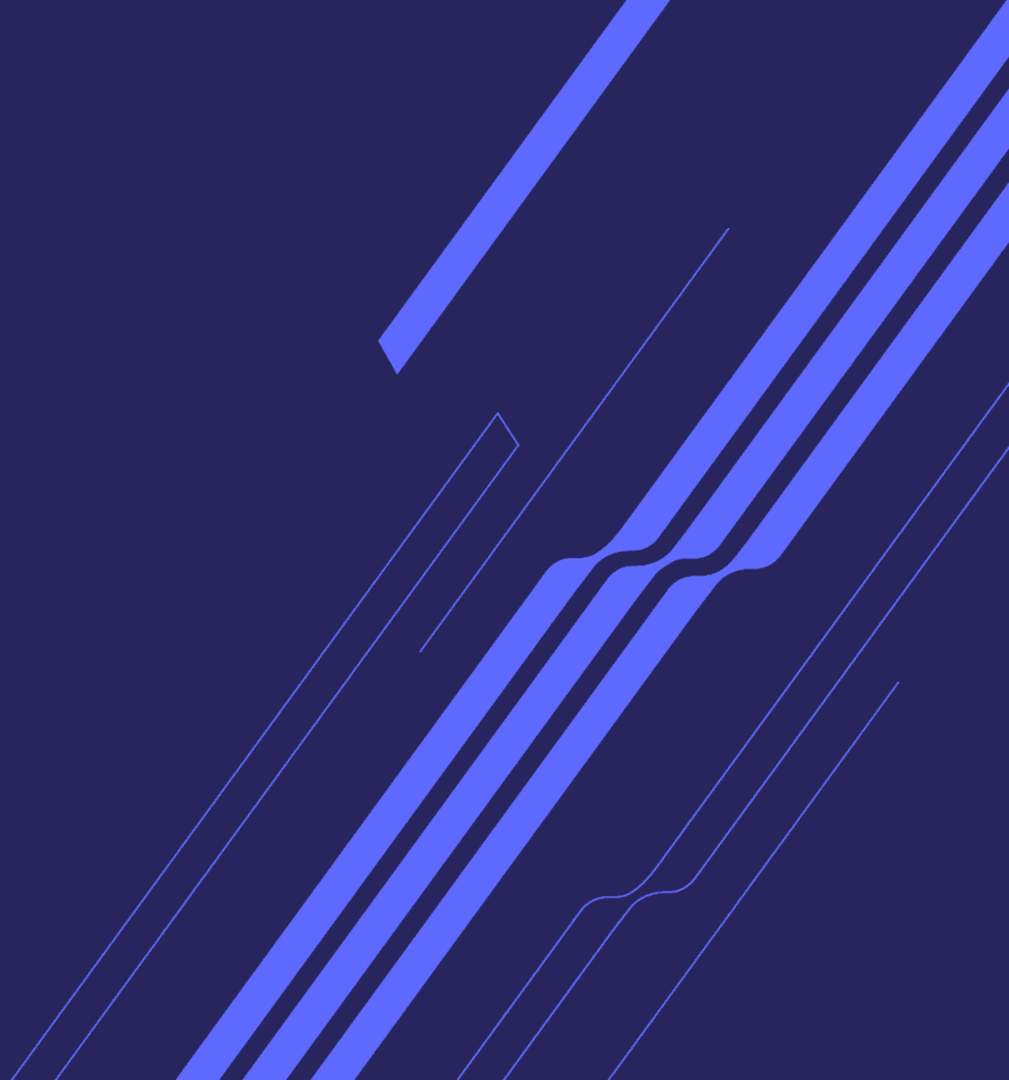

Next Steps

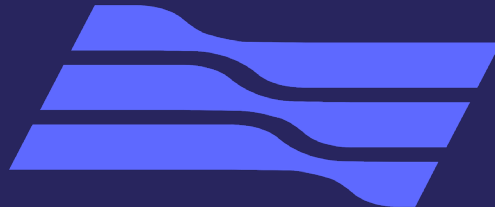

Next Steps

- Individual transition plans will be sent by Charles
- We will continue to update the project webpage with our progress
- Keep an eye out for emails

Q&A

RHODIAN

Thank you!
